

EXECUTIVE SUMMARY

- The ongoing impacts of the COVID-19 pandemic, and the change in trading relationship with the EU, led to a 28% fall in UK food and drink exports in Q1 2021 when compared to 2020, and a 36% fall when compared with pre-COVID Q1 2019 figures.
- Exports to the EU fell by 47% compared to Q1 2020, whereas food and drink industry sales to non-EU countries were up by 0.3% in Q1 2021.
- For the first time in the FDF's reporting, exports to non-EU markets exceeded those to the EU, making up 55% of all UK food and drink exports.
- Exports to the Republic of Ireland, traditionally the sector's biggest export market, were down 71% at just £281m, compared to £961m in Q1 2020.

Q1 UK FOOD AND DRINK EXPORTS OVER 10 YEARS

EU EXPORTS

- Exports to the EU in Q1 2021 were less than half the amount exported pre-COVID in 2019, a loss of more than £2bn of sales.
- Exports to nearly all EU Member States fell significantly. Sales to Ireland were down by more than two thirds, while sales to Germany, Spain and Italy declined by more than half since Q1 2020.
- Dairy products have been most badly impacted. Exports of milk and cream to the EU were down by more than 90%, and exports of cheese down by two thirds since Q1 2020.
- The official export data produced by HMRC excludes intra-company transfers of goods, so in practice the value of products that moves into the EU is higher.

GROWTH MARKETS

- While exports have been badly impacted in many markets, we have seen a return to strong growth in exports to East Asia, where there is high demand for quality UK food and drink.
- Q1 2021 exports to China, Hong Kong, Japan and South Korea were all above the levels seen in Q1 2020, when the COVID-19 pandemic triggered the early closure of hospitality sectors.
- Exports to China have seen a return to the rapid pre-COVID export growth. Q1 sales were up by more than a quarter, driven by growth in exports of pork, whisky and vegetable oils.

UK IMPORTS FROM THE EU

- Imports were down 10% in Q1, driven by a fall of more than 15% in imports from the EU compared to the same period last year.
- This was driven by a number of factors including the continued closure of the UK's hospitality sector, stockpiling in late 2020, reduced demand for ingredients as a result of the decline in exports to the EU and also potential import substitution.
- Imports from the UK's top six EU suppliers all fell, with the Netherlands and Spain down by 26% and 10% respectively. A significant volume of imported fruit and vegetables arrives via these countries, and the drop was reflected in the product data.
- Products of animal original were also heavily impacted, with large falls in imports from the EU of pork, cheese, chicken and beef.
